</table>

- Females participated in the survey at a slightly higher rate than males and are therefore slightly overrepresented within the group of survey respondents.

- There were few differences between respondents and the population by race/ethnicity and job classification.

- Part-time and temporary employees had a lower response rate, so full-time and permanent employees are somewhat overrepresented in the survey results.
Limitations of the 2016 Diversity and Inclusion Campus Climate Survey

A review of the survey data identified some issues with non-completion rates and related issues that should be considered in evaluating the usability of the results.

• Non-completion rate is the percentage of respondents who started the survey but exited before reaching the last section.
• The overall non-completion rate for this survey was approximately 13%. It differed slightly by group; for example, 14% of Asian, 12% of Black/African American, and 11% of Hispanic respondents exited the survey at some point before the last section compared to 10% of White respondents.
• This reduction in the number of responses to items in the latter part of the survey raised additional questions about the representativeness of those results, especially for small groups.
• The 2016 Diversity and Inclusion Climate Survey took an average of 20 minutes to complete. Research has shown that length greatly affects survey completion and that longer surveys contribute to non-response and non-completion.
• Some items, particularly those with branching questions and long lists of response options, yielded partial responses that were difficult to interpret.
• For this report, efforts were made to avoid items with large numbers of missing and partial responses, and to present results using simple descriptive statistics disaggregated by basic demographic groups.
Satisfaction with Campus Diversity
Satisfaction with Campus Diversity: Key Findings

• Satisfaction with the racial and ethnic diversity of the faculty, staff, and student body:
  – Black/African-American respondents were the least satisfied with the racial and ethnic diversity of the faculty, staff, and student body at UNC-Chapel Hill compared to all other racial groups.
  – Asian/Native Hawaiian respondents were the most satisfied with racial and ethnic diversity across campus.
  – In terms of political beliefs, respondents with liberal leanings were the least satisfied with racial and ethnic diversity, followed by moderate respondents. Conservative-leaning respondents were the most satisfied.

• Satisfaction with the atmosphere for gender and sexual orientation differences:
  – Respondents who reported a gender other than male or female were much less satisfied than males or females with the atmosphere on campus for differences in gender identity and sexual orientation. Females were slightly less satisfied than males with these aspects.

• Satisfaction with the atmosphere for differences in political and religious beliefs:
  – Conservative-leaning respondents were the least satisfied with the atmosphere for differences in political beliefs and religious beliefs. Liberal-leaning respondents were the most satisfied with these aspects.

Educational Benefits of Diversity
Educational Benefits of Diversity: Key Findings

- **Initial expectations for diversity among faculty, staff, and students:**
  - White respondents agreed at a lower rate than respondents from other race/ethnicity groups that they had chosen to work at UNC-Chapel Hill partly for opportunities to encounter diversity.

- **Benefits of exposure to diverse people and ideas at UNC-Chapel Hill:**
  - Three-fourths of all respondents reported having benefited from being exposed to diverse people and ideas at UNC-Chapel Hill, with American Indian staff reporting the highest level of agreement and staff identifying as Two or More Races reporting the lowest level of agreement.
  - Close to three-fourths of respondents agreed that this exposure improved their ability to understand people from racial or ethnic backgrounds different from their own, with White staff reporting the highest levels of agreement and staff identifying as Two or More Races again reporting the lowest levels of agreement.
  - More than two-thirds of American Indian respondents agreed that their UNC-Chapel Hill interactions with people whose race/ethnic was different from their own challenged them to think differently about issues. Among other race/ethnicity groups, about half of respondents agreed with this statement.
Educational Benefits of Diversity

Since coming to work at UNC-Chapel Hill, I have...

(\% responding “Often” or “Very Often”)

Learned from perspectives offered by community members at UNC-Chapel Hill whose gender is different from my own.

Supportive Campus and Sense of Belonging
Supportive Campus and Sense of Belonging: Key Findings

- **Commitment to diversity:**
  - Respondents who were Black/African-American, Hispanic, or Two or More Races reported the least agreement with the statement that UNC-Chapel Hill is committed to diversity, compared to other respondents.
  - Respondents who identified as Other/Self-Identified gender and those who reported their political beliefs as liberal also reported less agreement that UNC-Chapel Hill is committed to diversity, compared to males, females, and those with moderate or conservative political beliefs.

- **Cultural differences:**
  - With very little variation among racial groups, about two-thirds of respondents agreed that UNC-Chapel Hill promotes the appreciation of cultural differences.

- **Respectful campus:**
  - There was very high agreement among all groups that UNC-Chapel Hill is an institution with respect for the expression for diverse values and beliefs, and that students, staff, and faculty respect each other.

Impact of Low Representation
Impact of Low Representation: Key Findings

• Pressure based on racial or ethnic background:
  – More than one in five respondents who were American Indian, Asian/Native Hawaiian, Black/African-American, Hispanic, or Two or More Races reported feeling pressured at work to represent the views of all people from their racial/ethnic background and feeling the need to minimize aspects of their racial or ethnic culture to fit in at UNC-Chapel Hill. Agreement with these statements was particularly high for American Indian respondents. Only about one in fifty White respondents agreed with these statements.

• Isolation:
  – Respondents who were American Indian, Black/African-American, Hispanic, and reported Other/Self-Identified gender indicated higher levels of isolation at work because of the absence or low representation of people like them.
Low Representation

Level of agreement with the following statements:
(% responding “Agree” or “Strongly Agree”)

I feel pressured in my workgroup to represent the views of all people from my racial or ethnic background.

By Gender
- Female: 7%
- Male: 6%
- Other/Self-Identify: 7%

By Race/Ethnicity
- Amer. Indian: 30%
- Asian + Hawaiian: 18%
- Black: 22%
- Hispanic: 22%
- White: 2%
- 2 or More + Other: 13%

I feel pressured at UNC-Chapel Hill to represent the views of all people from my racial or ethnic background.

By Gender
- Female: 6%
- Male: 7%
- Other/Self-Identify: 14%

By Race/Ethnicity
- Amer. Indian: 12%
- Asian + Hawaiian: 22%
- Black: 17%
- Hispanic: 2%
- White: 12%
- 2 or More + Other: 52%

I feel that I need to minimize aspects of my racial or ethnic culture to fit in here.

By Gender
- Female: 11%
- Male: 12%
- Other/Self-Identify: 7%

By Race/Ethnicity
- Amer. Indian: 43%
- Asian + Hawaiian: 20%
- Black: 30%
- Hispanic: 23%
- White: 5%
- 2 or More + Other: 24%
I feel isolated in my workgroup because of the absence or low representation of people like me.

- By Gender:
  - Female: 12%
  - Male: 12%
  - Other/Self-Identify: 36%

I feel isolated at UNC-Chapel Hill because of the absence or low representation of people like me.

- By Race/Ethnicity:
  - White: 8% (Female), 20% (Male)
  - Hispanic: 26% (Female), 25% (Male)
  - Black: 22% (Female), 10% (Male)
  - Amer. Indian: 16% (Female), 9% (Male)
  - Asian + Hawaiian: 22% (Female), 46% (Male)
  - Amer. Indian: 14% (Female), 10% (Male)

  - Hispanic: 4% (Female), 20% (Male)
  - Other/Self-Identify: 43% (Female), 0% (Male)
Experienced Bias
Experienced Bias: Key Findings

• Experiences of bias by respondent gender:
  – Respondents in the Other/Self-Identified gender group reported experiencing bias at much higher rates than male or female respondents.

• Experiences of bias by respondent race/ethnicity:
  – Respondents who were American Indian, Asian/Native Hawaiian, Black/African-American, Hispanic, or Two or more Races reported experiencing bias at higher rates than White respondents. For all groups except for White and Two or More Races, the most frequent types of biases reported were based on race/color or national original/ethnicity.

• Experiences of bias by respondent sexual orientation:
  – Respondents who identified an orientation other than heterosexual reported experiencing bias at slightly higher rates than heterosexual respondents.

• Experiences of bias by respondent political orientation:
  – There were not large differences in the rates of experiences of bias by political orientation, although respondents who were conservative were the only group to believe they had experienced bias based on their political beliefs.

Observed Disparaging Treatment
• **Observations of disparaging treatment by respondent gender:**
  – All gender groups reported hearing insensitive or disparaging remarks from staff and students more often than from faculty or administrators. The most common types of disparaging remarks reported were based on race or color.

• **Observations of disparaging treatment by respondent race/ethnicity:**
  – American Indian, Black/African-American, or Two or More Races respondent groups reported hearing more insensitive/disparaging remarks than other racial groups. The most common type of disparaging remarks heard were based on race or color, although some respondents also reported hearing disparaging remarks based on level of education.

• **Observations of disparaging treatment by respondent sexual orientation:**
  – Respondents who identified their sexual orientation as other than heterosexual reported observing insensitive/disparaging remarks more often than heterosexual respondents. The most common types of disparaging remarks reported were based on level of education when the remarks came from administrators or faculty, race or color when they came from staff, and sexual orientation when they came from students.

• **Observations of disparaging treatment by respondent political orientation:**
  – All groups reported hearing insensitive/disparaging remarks from staff and students more often than from faculty and administrators. The insensitive remarks reported were generally based on race or color.
